

Faronics  
**ANTI-EXECUTABLE™**

## Stop Threats Before They Start by Blocking Unauthorized Executables

Today's sophisticated threats like zero-day attacks, mutating malware and advanced persistent threats necessitate an approach that goes beyond a traditional antivirus solution. By ensuring only approved applications are allowed to run on a computer, Faronics Anti-Executable blocks such unknown threats that can bypass your antivirus solution.

Faronics Anti-Executable provides security beyond an antivirus by blocking unauthorized programs – whether malicious, unlicensed or simply unwanted – from ever executing.

- ▣ **Cutting Edge Security**  
Protects users from unknown threats such as zero-day attacks, mutating malware, advanced persistent threats and sophisticated attacks.
- ▣ **Granular Control**  
Allows organizations to enjoy the benefits of application control such as publisher-based approvals, policy-based control, and protection at the local machine level.
- ▣ **Flexible Control**  
Allows the creation of policy-based user groups customized for different computer usage needs.
- ▣ **Boosts IT Productivity**  
Accelerates IT productivity with an automated initial set-up, standardized configuration, central management, and reduced IT support tickets.
- ▣ **Operational Savings**  
Ensures computers, systems and bandwidth are used for intended purposes.
- ▣ **Manage with a Central Console**  
Management, deployment and configuration are made possible via a single web-based or on-premise console.

### Did You Know?

It takes

**11.6 days**

for antivirus vendors to catch new malware.

- Cyveillance

“Faronics Anti-Executable is crucial to preserving mission-critical law enforcement systems to ensure reliability and security with minimal downtime and with the least reliance on IT personnel.

- Los Angeles Police Department Information and Communication Services Bureau

## Did You Know?

The average consolidated total cost of a data breach is **\$3.8 million**, while the cost incurred for each lost or stolen record containing sensitive and confidential information is **\$154**.

- Ponemon Institute

“Extensive testing of Faronics Anti-Executable reveals it to be an excellent product with well thought out features

- Cognetic Systems, Inc.

## Key Features

### Application Control and Security

Authorize or prevent the execution of .exe, .dll, .com, .scr, .jar and .bat files.

### Publisher and User Based Control

Multiple levels of control for various publishers and user types. Built-in Trusted Publisher function helps manage all updates from a specific publisher.

### Control List and Policies

Automatic creation and maintenance of application control lists and policies.

### Network Level Blocking

Allow or block execution of applications regardless of location.

### Realtime Logging

Logs all unauthorized application launch and software installation violations.

### Comprehensive Reporting

Reports all violations, blocked programs and activity, including which programs are causing the most violations and which machines have the highest number of violations.

### Compatibility Options

Complements Active Directory and Group Policies. Offers option to designate specific applications like anti-virus programs to be trusted and exempt from restrictions.

### Discrete Operation

Supports stealth mode to obscure presence from end user.

### Central Management

Available with an on-premise or hosted console to make deployment, configuration and management of updates a breeze.

### Active Directory Integration

User management is integrated with Active Directory.

### Faronics Deep Freeze Integration

Automatically enters maintenance mode upon a Deep Freeze maintenance event that Thaws the computer.

### Integration with Faronics Anti-Virus

Integrates with Faronics Anti-Virus to ensure the initial installation scan is free from malware.
